

The information we perceive every day is overwhelming. We do wish some of them could be filtered out, and that's when SiLens comes in.

SiLens is a free app you can install onto your AR lens, and it grants you the right to deny seeing someone. Add a few members to your blocklist, and SiLens will instantly block them, based on image recognition.

我们每天所接收到的信息量是过载的。我们多么希望自己能将其中一些过滤掉，屏蔽掉。而 SiLens， 为此而生。

SiLens 是一款免费的 AR 眼镜应用程序，它让你拥有屏蔽一切事物的能力与权利；只需将目标添加至黑名单，他们便将永远消失于你的视野之中。

What is SiLens
SiLens 应用简介

Mum will not let the baby get exposed to sensitive content. Dad will not let his son get exposed to Genshin Impact. Hanna can not bear seeing Xiao Zhan 'cause she hates him so much. Jesse can not bear seeing Pepe Frog 'cause it looks awful.

However, They may appear on the app launch screen. They may appear on your Weibo timeline. They may appear on your friend's phone case. They may appear on the city ad banner. They are everywhere and we shall never escape.

妈妈不想让自己的女儿接触到敏感内容；爸爸不想让自己的儿子碰上原神这款游戏；小美不想看到肖战，因为她恨透了这位男明星；小帅不想看到悲伤蛙，因为它长得实在太瞎眼。

然而，可能下一秒他们就会出现在app的开启界面；出现在微博和朋友圈的时间线；出现在朋友的手机壳上；出现在地铁站的广告横幅上.....

Upcoming Features for SiLens
下一代 SiLens 将配备的功能

SiLens in different moods
SiLens 的每日心情

Bee and Pepe
小蜜蜂与悲伤蛙

SiLens embedded into Hololens
SiLens 图标嵌入 Hololens 界面

On toggling this button, you decide whether a member is blocked or not. Would be useful if you need to see someone temporarily.

Blocklist

To add a new member to the blocklist, either input the keywords or upload images.

- 1. Shrek
- 2. League of Legends
- 3. Nerds
- Unlock blocklist limits (\$1.99)

Double-tap the thumbnail, and you can have further control over a member. You can set different block effects for each member.

By default, you can have up to three members in your blocklist.

Blocklist

Settings

Settings

- Run automatically at startup
- Show logo when block is working
- Block relevant context
- Extra block effects (\$0.99)

Set to on by default. Better not turn it off, as manual launch could be a waste of time.

This option helps indicate whether SiLens is currently working.

Made possible by layout recognition. It works best on posters and web content.

Several special block effects for you. You can have a free trial before paying.
